

## ZMM

Zone Monitor Module

### Description

Zone monitor module provides an interface between a zone of conventional 2 wire fire detector and an intelligent signaling loop. the module monitor the conventional zone and transmits the state of the zone ( NORMAL, OPEN, SHORT or ALARM) to the panel.

### FEATURES

Improve design for ease of wiring meaning faster installation  
Contains controllable isolator  
Earth fault monitoring

### TECHNICAL SPECIFICATIONS

Input Voltage	24V DC
Operating Temperature	0~55 °C
Output & N/C Input	Green LED
Output with feedback	Red LED
Fail Safe output with feedback	Green LED
Dimensions: L*W*H	100*48*23 (size are in mm)
Weight	40 gm.
